

STRONGVIEW VISTA

MOTORIZED SCREEN

From 36'- 7" (11.15 m) up to 54'-9" (16.69 m) in image width

The large made-to-order Vista is scalable up to an impressive 54'-9" in image width. The screen comes equipped with a quiet drive system, wireless control, adaptable rigging hardware, custom welded black borders, our exclusive cinema-grade front or rear projection surfaces and a durable tab-tensioning system for a smooth, flawless image.

The Vista is designed for large multi-purpose venues and heavy-use environments such as university auditoriums, large theatres or exhibition halls.

FEATURES

- ▶ UL Recognized, CSA Certified & CE Mark motor with brake system
Driveshaft mounted emergency brakes available
- ▶ 2HP (2.5kW) 3 Phase 208-240 VAC motor centrally mounted
On special request, motor unit and gear box mounted on either end of the truss structure
- ▶ 10" (254 mm) aluminum roller tube
- ▶ Custom black PVC masking borders
- ▶ Adaptable rigging hardware
- ▶ Machined aluminum drums with cable winding guards
- ▶ Control box and integrated automation system mounted remotely (installation requires certified electrician)
All-in-one package with control box and automation system integrated into head truss assembly available
- ▶ 30ft (9m)/min deployment speed
Custom deployment speed available
- ▶ Digitally encoded holding position can be fine tuned by user - upper threshold safely limited by a redundant mechanical switch
- ▶ 5/32" (3.97mm) mil-spec tensioned steel winding cables
- ▶ 1-1/2" x 1-1/2" (38mm x 38mm) and 1" x 1" (25mm x 25mm) square tubing head truss assembly
- ▶ Head truss protected by 3mm matte black expanded PVC cover panels
Robust IFR elastomer fabric dust cover available as lighter alternative
- ▶ Tab-tensioned (non-perforated and non-coated) front or rear projection surfaces
